

Declaration: Doctors Call for Protection from Radiofrequency Radiation Exposure

Physicians Call for Health Canada to Provide:

- i) Wireless safety standards that are more protective of the health of Canadians; and
- ii) Guidelines and resources to assist Canadian physicians in assessing and managing health problems related to microwave radiation.

There is considerable evidence and research from various scientific experts that exposure to microwave radiation from wireless devices; Wi-Fi, smart meters and cell towers can have an adverse impact on human physiological function.^{1 2} Many recent and emerging studies from university departments and scientific sources throughout the world support the assertion that energy from wireless devices may be causatively linked to various health problems including reproductive compromise, developmental impacts, hormonal dysregulation and cancer. In fact, in 2011 the World Health Organization listed microwave radiation as a Class 2B possible carcinogen³ and subsequent research strengthened the evidence that a stronger designation may be justified.^{4 5 6}

Out of sincere concern for the health of Canadians at all stages of life – from the developing fetus through childhood and into adulthood – we respectfully request that:

- i) Health Canada develop and support strategies to raise awareness about microwave radiation impacts and to minimize prolonged exposure to microwave radiation in schools and other places where children are regularly exposed.
- ii) As Health Canada has acknowledged that a full literature review was not part of its latest update of Safety Code 6 (the safety guideline for wireless exposure pertaining to thermal effects on the tissue of adult males) we request a comprehensive literature review for all age ranges with less reliance on industry-funded studies.
- iii) Health Canada provide guidelines and resources to assist Canadian physicians in becoming apprised of microwave exposure and related health problems and clinical presentations that may be associated with over-exposure or sensitivity (similar to the 2012, “**Guideline of the Austrian Medical Association for the diagnosis and treatment of EMF related health problems and illnesses.**”) (Note; this guideline is under review with an update expected.)

Dr. Jennifer Armstrong, MD, DIBEM, BSc, Past President, American Academy of Environmental Medicine, OEHC Ottawa Environmental Health Clinic, Ottawa, ON

Dr. Claire Astley, MD, DrTCM, Medical Acupuncture Practice, Victoria, BC

Dr. Robert Banner, MD, CCFP, FCFP, FRCP, Dip AAPM, Dip CAPM, ABIHM, London, ON

Dr. John Barnhill, MD, FRCS(C), CCFP, Richmond, BC

Dr. Warren Bell, BA MD CM CCFP FCFP; Board member and Past Founding President, CAPE (Canadian Association of Physicians for the Environment); Member and Past Founding President, WA:TER (Wetland Alliance: The Ecological Response); Founding member, HUESSS (Health Uranium Environment Sustainability Survival Solidarity); Rural Preceptor, Faculty of Medicine, UBC, Vancouver, BC

Dr. Alison C. Bested, MD, FRCPC, Clinical Associate Professor, Faculty of Medicine, University of British Columbia, BC
