 Toronto

Dear Dean, Former Dean and Faculty of Law Professors,

Corruption in Health Canada and Industry Canada  
 Threatens Health and Well-Being of Every Man, Woman and Child in Canada!  
 In Violation of the Nuremberg Code!

Unprecedented, pandemic corruption now enveloping Health Canada's Radiation Protection Bureau ("Health Canada"), Industry Canada and the four radiation Regulatory Agencies: the WHO (World Health Organization), ICNIRP (International Commission on Non-Ionizing Radiation Protection), ICES (International Committee on Electromagnetic Safety) and the FCC (Federal Communications Commission) literally threatens the health and well-being of every living person, flora and fauna on Earth today! This is not an exaggeration!

I am a retired Canadian Armed Forces Captain who spent 22 of my 26 years in the arcane military fields of Electronic Warfare (EW) and Signals Intelligence (SIGINT). The former included two years in National Defense Headquarters (NDHQ), Ottawa, where I was employed as a Staff Officer EW within the Directorate of Electronic Warfare (DEW). Thanks to Canada's ill-fated experiment with the unification of its three armed forces, I enjoyed the unprecedented opportunity to gain experience in first naval, then army EW operational environments. For this reason, my qualifications in EW were and still are unique in the history of Canada's military. In army EW, I completed a major NATO army EW officers' course in Anzio, Italy, and participated in a major NATO army EW field exercise in the Black Forest of Germany. In naval EW, I served operationally in two Canadian warships and worked with mainly U.S. EW naval units. In the SIGINT world, I was the Executive Officer and Operations Officer at one of Canada's largest and most sensitive intelligence-gathering radio stations where I personally was responsible for 200-plus specially-trained radio operators and technicians. Throughout my career I worked closely with the USA's National Security Agency, NSA, and to a lesser extent with Britain's GCHQ.

I have deliberately sought out each of you because of your celebrity and stature within Canada's elite legal community. It is my earnest hope that each of you will take the time to read this and can grasp the scale, scope and gravity of today's unprecedented corruption, which literally threatens every man, woman and child in this country (and all countries of the world) – including each of you and your families! Were you to do so, I am confident that none of you will hesitate to utilize your contacts at the highest possible levels of government and the judiciary to the fullest, to ensure that our government leaders are personally made aware that they themselves have been – and still are being – victimized by unconscionably corrupt authorities within their very own government departments (named above). This includes the Prime Minister himself, whose PMO staff seem bent on ensuring communications such as this do not reach him!

It is absolutely mind-boggling to think that such an evil thing could be happening today, not just here in Canada, but in most countries of the world! Never before in Canada's (or the world's) history have all governments at all levels right across this country and the public been so thoroughly and convincingly duped, misled, deceived and actually lied to by cruel, heartless and corrupt individuals who must have some incredibly nefarious plot they are pursuing! As was previously stated, Canada's perpetrators are key individuals within Health Canada and Industry Canada, who continue to say – as they have for decades – that all wireless devices are perfectly safe to use! That is an unmitigated lie! Not one of today's wireless devices has ever had to undergo pre-market 'safety' testing by independent scientists to ensure: a) that it is safe for the public to use on a 24/7/365 basis in perpetuity; or b) that it can be safely used in populated areas 24/7/365 in perpetuity without harming people (e.g., Smart Meters being a classic example)! Nor has there ever been a single credible (non-industry) study done that proved cell phones are safe to use! Whereas, there have been literally thousands of studies done by honest scientists (those not paid by industry or the military) from all over the world showing that low-level, pulsed, non-thermal radio frequency (RF) electromagnetic radiation (EMR) is harmful to all living things: humans, flora and fauna – regardless of whether the emitter is a baby monitor, Smart Meter, Wi-Fi router, cell phone, etc.! Yet, incredibly, Health Canada has just released its "revised" Safety Code 6 (2015) - which continues to tell governments and the public alike that all of today's devices are harmless? Absolutely mind-boggling!

History knows that Soviet scientists began researching the harmful bio-effects of non-thermal radiation on plants, animals

and people in 1933! Even then the Soviets and Eastern Bloc countries knew of the harmful bio-effects of non-thermal radiation! Consequently, their 'safe' radiation Exposure Limits were – and still are - based on non-thermal radiation. The umbilically-tethered Americans, Canadians, British and Australians, on the other hand, refuse to acknowledge that non-thermal radiation even exists, let alone that [it] is harmful to humans, flora and fauna! THAT is the fundamental problem. Since at least the 1950s, the Soviets, followed closely by the U.S. military, have conducted exhaustive research of all RF frequencies to determine which, if any, are harmful to humans. In doing so, they experimented with every conceivable combination of frequency, polarity, modulation, duration, power density (signal strength) etc. In particular they exhausted the capabilities and limitations of pulse modulation in its many forms: pulse duration, duration between pulses, pulse repetition rate (PRR), pulse repetition frequency (PRF) pulse height, etc. Suffice it to say, by the 1960's both militaries certainly knew everything there was to know about the harmful effects of certain RF frequencies, which includes microwaves. All modern militaries today consider microwave energy (frequencies) to be the "perfect weapon," for one cannot see them, hear them, smell them, taste them or touch them! Microwaves are particularly attractive because some frequencies easily penetrate walls -- even concrete, with impunity! And they leave no evidence! Consequently, all modern militaries today continue to expend ever-greater sums of money to build up their arsenals of these stealth RF weapons. Knowing this, it is absolutely obscene for Industry Canada to continue to allow baby monitors, Smart Meters and today's other wireless devices to use these very same frequencies, just as it is for Health Canada to continue telling governments and the public that this radiation is safe! Clearly, neither has a conscience!

It is also disgraceful that Health Canada makes it obvious that they have no concern whatsoever for the public's valid fears about all of today's microwave radiation. How can Health Canada possibly defend itself against those who believe that they (Health Canada) simply went out, hired a new group of wordsmiths, re-packaged the same old diatribe, incorporated most of the same old 'industry' studies, while still stubbornly excluding over 2300 Soviet studies (showing harmful effects of radiation) and 130 or more similar studies provided to them by Canadians 4 Safe Technology? On what legitimate grounds could Health Canada have rejected all of these studies, save for the fact they were not funded by industry or the military?

Today's ever-growing constellation of wireless devices is literally putting Earth's entire environment at enormous risk! It is known that all of today's wireless radio devices: e.g., baby monitors, Smart Meters, cell phones, cell phone towers, cordless phones, Wi-Fi routers, tablet and laptop computers, RFIDs, Bluetooth, TV games (Wii, Xbox, Play Station etc.), AM and FM transmitting towers, GPS and the thousands of military, scientific and commercial satellites always present but invisible in the sky, all radars – police, military, marine, aeronautical, sports, etc., Wi-Fi and Wi-Max zones, etc., emit "low-level, pulsed, non-thermal radio / microwave frequency radiation," which scientists and militaries have known for decades is especially harmful to all life forms, not just humans! Many of these devices can't be shut off and therefore irradiate the population continuously 24/7/365 in perpetuity, e.g., Smart Meters, cell phone towers, Wi-Fi routers, cordless phones, GPS and thousands of invisible satellites, AM and FM radio and TV etc.

Honest scientists have long known that pulsed non-thermal EMR (radiation) causes, promotes or is linked to many cancers, neurological conditions, ADD, sleep disorders, depression, Autism, Alzheimer's, Parkinson's, cognitive problems, cardiovascular irregularities, hormone disruption, immune system disorders, metabolism changes, stress, fertility impairment, increased blood brain barrier permeability, mineral disruption, DNA damage, etc. [1]

Although this subject has a lengthy military history dating back to the 1930s, out of respect for your time, I have selected just a few of the more highly relevant historical facts to defend my preposterous but deliberate allegations against Health Canada and Industry Canada!

1932 - "Microwave Sickness" was first documented by German scientists. Today it is called electro-hypersensitivity or "EHS." Note: Neither Health Canada nor three of its four equally corrupt radiation Regulatory Agencies: ICNIRP, ICES or the FCC will admit that such a condition exists or is possible! They seem to have forgotten or perhaps didn't know that the U.S. Air Force first reported it in 1955! [2] Even the corrupt WHO recognized it in 2005 [3], as have many countries of the world. The WHO's own Director General, Gro Harlem Brundtland, MD, MPH (Harvard U.), a former two-time Prime Minister of Norway was the first celebrity to announce that she suffers from EHS. That was c2002!

By 1933 Soviet scientists recognized that electromagnetic fields (EMFs) affected the human nervous system. Indeed changes to the central (CNS) and autonomic (ANS) nervous system attributed to radio frequency radiation were frequently documented ..... Frequencies from 30 MHz to 300 GH at both thermal (greater than 10 mW/cm<sup>2</sup>) and non-thermal (microW/cm<sup>2</sup> to milliW/cm<sup>2</sup>) intensities were known to affect the CNS." [4]

1950s – Both the U.S. and British militaries acknowledged, separately, that 'non-thermal' radiation is harmful to people [5] [6]

1953 - 1976 - The Soviets irradiated the U.S. Embassy in Moscow for 23 years using essentially the same microwave frequencies, with similar modulation and signal strengths used in today's devices (baby monitors, Smart Meters, cell phones, etc.) but did so for only 6-8 hours a day, for just 5 days a week! Even so, two consecutive ambassadors died of cancer, a third developed Leukemia-like symptoms and eventually succumbed; 16 women developed breast cancer and virtually all of the other staff experienced some adverse reaction to the radiation. [7] [8]

In 1961, then U.S. President Dwight D. Eisenhower warned the American people to be on guard against the emergence of a corrupt government / military complex. Today's reality dwarfs even his wildest fears. [9]

In 1971, just 10 years later, then U.S. President Richard Nixon's own Electromagnetic Radiation Management Advisory Council warned: "power levels in and around American cities, airports ... and homes may already be biologically significant." The population at risk "may well be the entire population." The consequences of undervaluing or misjudging the biological effects of long-term, low-level exposure could become a critical problem for the public health, especially if genetic effects are involved. [10] (This was 15 years before wireless radio devices appeared in Canada!)

By 1971 there were more than 2,300 references to documents that detailed the biological effects of radio frequency and microwave radiation from various technologies including radar and mobile communications, navigational devices, and physical therapy devices such as microwave and shortwave diathermy. What an amazing find, especially since the WHO and the wireless telecommunication industries continually state that there is no credible research showing that non-ionizing, non-thermal microwave radiation is harmful at levels below our existing thermal guidelines! [11]

1975 – The U.S. Defense Intelligence Agency warned its own personnel of the risks from low level EMR including: microwave sickness (flu-like symptoms, depression, suicidal tendencies) to cancers and leukemia [12]

1993 – 1999 The USA's CTIA (Cellular Telecommunications Internet Association) who lobby nationally to all levels of government on behalf of the wireless and telecom industries in the U.S. commissioned the largest-ever study of cell phones in U.S. history (six year, \$28.5 USD million). Its then president, Tom Wheeler (who today is Chairman of the omnipotent and totally corrupt FCC!) hired Dr. George Carlo, PhD, JD, to do the study, the results of which proved cell phones are harmful to people! The scientists were fired, the report buried, and within two years, Dr. Carlo's home mysteriously burned down! [13]

Honest scientists have said: "There is no such thing as a safe "threshold" of microwave radiation; the only safe "level" is zero." [14] Others have said, if there is a safe exposure level, we can't detect it! [15]!

As a retired EW officer, who has committed himself to researching this whole subject matter for the past almost six years, I know that the major militaries of the world have researched and catalogued those frequencies of the entire RF spectrum that can most harm a human's central nervous and immune systems. For years they have had and continue to build major arsenals of weapons to exploit the frailties of the human body, especially the brain. Militaries have long known that frequencies within the band 1-5 GHz are the most effective, because they penetrate all organ systems of the body, which puts all of those organ systems at risk! Governments need to wake up and realize that all of today's wireless devices operate within those very same frequency bands – even baby monitors and Smart Meters! [16] [17] Need I say more?

It is my firm belief that this information is being deliberately kept from the Prime Minister, himself, from his entire cabinet, from the leaders of all governments across Canada, and from Provincial Health Officers - who have no training in the electromagnetic spectrum and know even less about the harmful effects of low-level, pulsed, non-thermal radiation! This explains why I am appealing to you, distinguished lawyers - out of sheer desperation! But this is your fight too, for your families are being victimized, as is mine and the entire general population! Canada's history books can show that it was you who saved this once proud and democratic country"! The question though is: will you? Thank you for your time.

Respectfully,  
Jerry Flynn

James G. ("Jerry") Flynn
