

# Smart Meters, Electromagnetic Health Effects, and Fire Danger: **FACTS, NOT FICTION**

The Grand Forks Watershed Coalition and Greater Grand Forks Area D residents will host an educational forum about Itron smart meters on

**Wednesday, August 12, 2015 6 - 8 p.m.**

**Seniors' Centre, 565 71<sup>st</sup> Avenue, Grand Forks**

Malcolm Paterson, Ph.D., will speak on the following topic:

## **The Electromagnetic Age -A Sleeping Giant?**

Brain tumors, Alzheimer's dementia, sleep disturbances, decreased memory, male infertility, immune dysfunction, childhood learning and behavioral impairments – are all linked by scientific studies to Electromagnetic Fields (EMFs). The World Health Organization has classified EMF - producing wireless devices as possibly cancer-causing.

Malcolm Paterson, PhD, is an internationally recognized molecular oncologist whose career in cancer researches spanned over 40 years on 3 continents. Dr. Paterson will review the health-related science of wireless devices including smart meters, mobile phones, and Wi-Fi in schools. Learn the science-based facts and what you can do to protect the health of yourself and your family.

We will also show a video interview of Sharon Noble, Director of the Coalition to Stop Smart Meters, discussing recent Texas court decision alleging Itron smart meters are defective, and a fire hazard.
