

**My medical condition requires distance from wireless devices, so I must ask:**

**PLEASE MOVE 10 FEET AWAY FROM ME**

*thank you*

Even if you are not using your device, it emits wireless radiation unless you previously put it in Airplane Mode. (10 foot distance is not perfect but helps me.)

Wireless radiation can cause irregular heartbeat, pain, and other serious physical effects and illness in adults and kids.

**FOR YOU ...**

Even if you never learn more about this, please at least at bedtime power off all personal wireless devices & wireless network sources so that during those sleep hours the radiation dose for everyone at home is reduced (including for pets & neighbors).

**Tell other people about Electrosensitivity.**
