Subject: BCUC Smart Meter Fires -- A report

Dear Minister Trevena,

Next week you will receive a box containing 2 binders with a report and evidence gathered over the last 3 years, entitled "BCUC & Smart Meter Fires: The Failure to Protect". The report has been delivered to Premier Horgan's constituency office and mailed to Mr. Morton, CEO and Chair of BCUC. The covering letters are attached above.

I would ask that you and your staff give serious consideration to the documents and the evidence showing that rules and regulations are being ignored, and that the Office of the Fire Commissioner is not reporting or tracking fires as intended. Neither are electrical fires being inspected according to the BC Safety Standards Act. With the information available to the officials, it is impossible for them to know that the smart meters are failing, burning and putting the lives and property of British Columbians at risk.

Should you have any questions regarding anything in the report or require additional information, please let me know.

Regards,
Sharon Noble
