Subject: FW: Protect your citizens and wildlife from 50 Hz and radio frequency pulsed, non-thermal radiation!

November 24, 2017

Dear Prime Minister Ardern,

Congratulations on your recent election victory! As New Zealand's youngest-ever Prime Minister and as an open-minded, truthful, free-thinking young woman, I have been contacted by one of your constituents and asked if I would apprise you and members of your cabinet of what few people realize is the world's number one – and growing - problem today (explained below)! I ask only that you please read this whole letter, for then you will realize that I am not some deranged person in need of psychiatric help. On the contrary, you will realize that this is an issue deserving of your personal and immediate attention! Either way, your actions will affect you, personally, and all New Zealanders, especially all future generations! My military BIO is at the bottom of this letter.

A quick look at New Zealand's Ministry of Health's website suggests that, like Canada and other Western countries, your current government also has no health care specialist educated and trained in non-ionizing radiation, specifically in low-intensity, non-thermal electromagnetic field (EMF) radiation, of which there are two types: 1) extremely low frequency (ELF), also known as power line 50 / 60 Hz frequency, EMFs; and, 2) radio frequency (RF) EMFs, which in all of today's consumer wireless products as well as 'smart' meters and 'smart' appliances is emitted as hazardous pulsed RF. Like Canada and other Western countries, this puts New Zealand at the mercy of unscrupulously greedy electric power and telecommunications companies. (I strongly encourage you to consult with the most experienced Electronic Warfare specialists within NZDF who can advise you and your government of the health hazards of any wireless radio technology. They will also advise you that wireless 'smart' meters are utterly defenseless and should

never be used in any country's national power grid!)

World War II heralded today's radio frequency (RF) technology (which includes microwave frequencies), that, for the most part, has made our lives far more productive, comfortable, sociable and enjoyable, etc. However, scientists and major militaries of the world have long known that there are both thermal and non-thermal effects to RF EMF radiation. Thermal effects are those which heat the skin (as would occur in a microwave oven); whereas non-thermal effects are those which do not heat the skin, and which the human body cannot discern.

U.S. Military-Industrial-Complex (US M-I-C)

In 1961, in his final farewell speech to the nation, then U.S. President Dwight D. Eisenhower warned the American people to be on guard against the emergence of a corrupt U.S. military-industrial-complex!

<http://coursesa.matrix.msu.edu/~hst306/documents/indust.html> Tragically, too few people heeded him. Seven years later, in 1968, then U.S. President, Lyndon B. Johnson promised to protect Americans at work and in their homes from “*hazardous radiation emitted by TV sets and other electronics* (referring to non-thermal radiation).” *New York Times, January 18, 1968 Public Law 90-602, Oct 18, 1968*. Just three years later, in 1971, then U.S. President Richard Nixon's own radiation Management Advisory Council warned him:

“power levels (referring to the invisible non-thermal ELF and RF EMF radiation) in and around American cities, airports and homes may already be biologically significant.” “The population at risk may well be the entire population. The consequences of undervaluing or misjudging the biological effects of long-term, low-level exposure could become a critical problem for the public health, especially if genetic effects are involved.” *The Zapping of America, Paul Brodeur (1977) pp. 228*

Since the advent of microwave technology, the M-I-C has been committed to fully exploiting RF technologies for their maximum commercial gain – all of which emit hazardous pulsed non-thermal EMFs – with no regard for human health, safety and/or well-being! Sample products include: baby monitors, ‘smart’ phones, cell phones, cell phone towers, cordless phones, Wi-Fi routers, Bluetooth, tablet and laptop computers, GPS. Wi-Fi and Wi-MAX zones, electric vehicles, driverless vehicles, wrist watches, etc. At the same time, this same corrupt M-I-C, including Canada, the UK, Australia, New Zealand and the USA all refuse to publicly

recognize or admit that there are harmful non-thermal effects to RF EMF radiation! Preposterous! Nor will any of these countries recognize or admit that there is a condition known as electro-hypersensitivity or EHS, first reported in 1933, which today is conservatively estimated to affect at least 3-5 % of the world's population!

Today we all know (or know of) someone who has an autistic child or who suffers from ADHD or some other behavioural problem, Alzheimer's, dementia, Parkinson's, cardiac, asthma, depression or suicidal tendencies, or who had/has a stillborn or deformed child, suffers from memory or other neurological, immune or central nervous system disorder. Similarly, few schools today do not have 'special' needs teachers. It didn't use to be this way. What has changed? Take a hard, long look at the previous paragraphs!

Thank God for courageous, honest scientists like New Zealand's own Professor Neil Cherry (1946-2003)! He is thought to be the first Environmental Health scientist in the world to research and publish strong evidence that ELF (or 50/60 Hz powerline frequency) EMF emitted by overhead power transmission and distribution lines, substations, household electricity, electrical appliances, 'smart' meters, anything conducting electricity, and the RF EMFs emitted by consumer wireless products (sample given above) which are hazardous to humans and all living things! It was he who stated categorically, in 2000, that EMFs and radiation are a "Ubiquitous Universal Genotoxic Carcinogen that enhances the rates of Cancer, Cardiac, Reproductive and Neurological disease and mortality in human populations." He went on to say that the only safe LEVEL of either form of EMF is zero! <http://www.stayonthetruth.com/neil-cherry.php> Earlier, in 1979, American epidemiologist, Dr. Nancy Wertheimer, PhD (died 1979) was the world's first scientist to prove that even weak magnetic fields from ELF or power line distribution lines causes leukemia in children! <http://microwavenews.com/news-center/nancy-wertheimer-who-linked-magnetic-fields-childhood-leukemia-dies> Her findings have since been replicated by scientists in other labs around the world.

As New Zealand's newest Prime Minister, by now you can understand that mankind truly is at risk – as never before in human history! Here is your opportunity of a lifetime to make the entire world stand up and take note of your leadership, courage, integrity, honesty, sense of decency, and genuine concern for the health, safety and well-being of all living things, not just the human race! By doing so, you'd also be paying tribute to New Zealand's (and one of the world's) greatest epidemiologists – Dr. Neil Cherry, PhD, as mentioned above. Shamefully,

the electric power industry and wireless and telecommunications companies, with the cooperation of a sinfully silent mainstream news media, continue to claim – as they have for decades - that the EMF ‘radiation’ emitted by both technologies is perfectly safe to humans and other forms of life. It is an absolute tragedy that Western mainstream news media does not allow the world to know of today’s ongoing corruption. Had we a true “free press,” you and all of us would know that:

* In 2017, the International Journal of Oncology, August edition, posted a scathing indictment by Dr. Lennart Hardell, PhD, the world’s foremost authority on cell phone radiation and brain tumors, of the ongoing corruption and incestuous relationship that exists between the WHO, ICNIRP (International Commission on Non-Ionizing Radiation Protection), industry and the U.S. Military. The Dr. Michael Repacholi he mentions is the same person who established Health Canada’s initial Safety Code 6 (with Dr. Maria Stuchly), which he then also set for ICNIRP (assisted by Dr. Anders Ahlbom) before doing the same for the WHO! All three agency Exposure Limits were identical to each other and, odiously, to the U.S. military Exposure Limits, established in 1953 by the U.S. Navy, which recognized thermal-effects ONLY!

* In 2015, the International EMF Scientists Appeal, originally signed by 190 scientists from 39 countries (currently signed by 225 scientists from 41 countries) urges the Secretary General of the UN, all UN-member countries and the Director General of the WHO to protect mankind and wildlife from EMFs and wireless technology. <https://ehtrust.org/key-issues/cell-phoneswireless/emf-scientist-appeal-advisors-call-moratorium-5g/>

* In 2015, France created its own National RF Agency, i.e., it no longer follows ICNIRP or WHO! France bans Wi-Fi from nursery schools throughout the country; and other schools are urged to turn off Wi-Fi routers when not actually in use. Cell phone ads must recommend phones be held away from the head! http://ehtrust.org/france-new-national-law-bans-wifi-nursery-school/?utm_source=February+2014+Newsletter&utm>

* In 2014, 55 Canadian Doctors condemned Safety Code 6 and called for Health Canada to protect Canadians from RF exposure (EMFs). <http://www.c4st.org/images/documents/hc-resolutions/medical-doctors-submission-to-health-canada-english.pdf>

* In 2014, 53 Scientists from 18 countries condemned Safety Code 6 and call on Health Canada to intervene to help avoid an emerging health crisis!

http://www.albany.edu/ihe/assets/Scientist_Declaration.pdf

* In 2012, the “International Doctors’ Appeal.” Ten years after the “Freiburg Appeal” RF radiation poses a health risk. Physicians demand overdue precaution. More than 1000 physicians signed the “Freiburg Appeal” in 2002. Today—ten years later—we as physicians and scientists call again on our colleagues and the wider global community, but also on all politicians around the world.

[http://freiburger-appell-](http://freiburger-appell-2012.info/media/International_Doctors_Appeal_2012_Nov.pdf)

[2012.info/media/International_Doctors_Appeal_2012_Nov.pdf](http://freiburger-appell-2012.info/media/International_Doctors_Appeal_2012_Nov.pdf)

In closing, Prime Minister Ardern, I apologize for posing such a grave, complex issue to you, especially one that likely no one in your cabinet is trained in! But a leader must not evade problems, and one cannot exaggerate the gravity of this problem that now threatens every Western nation on earth! I respectfully suggest that New Zealanders would be wise to heed their own Professor Neil Cherry’s position. You may also wish to consider what France has done. In an effort to assist you, please note that non-industry EMF scientists around the world are members of ICEMS (International Commission on Electromagnetic Safety), who are listed by country on that organization’s website: <http://www.collective-evolution.com/2017/09/06/over-2000-peer-reviewed-studies-show-a-big-problem-with-your-your-childrens-favourite-gadgets/> Please be careful not to confuse ICEMS with industry-supported “ICES” (International Committee on Electromagnetic Safety), which is the U.S. Military-led committee of IEEE (Institute of Electrical and Electronics Engineers). I trust that you will do the right thing for New Zealanders. By doing so, you will not only write yourself into the world’s history books, you will also lionize Professor Neil Cherry, PhD. and make all New Zealanders proud of his contribution to world sanity and honesty!

Sincerely,

J.G. “Jerry” Flynn, Captain (retired)
