Subject: Beware - Cell Phone Towers are Dangerous!

Dear Island Trustees,

(My military BIO is in the Attachment.) Today's frightening disease epidemics include: autism, ADHD, leukemia, brain cancer, brain tumors, breast cancer, prostate cancer, bowel cancer and other forms of cancer, Alzheimer's disease, Parkinson's disease, ALS, suicides, depression, miscarriages, birth defects, sterility, Tinnitus (ringing in the ears), other neurological diseases, and diseases of the central nervous system and immune system, and people need to educate themselves about to-day's man-made radiation. Readers are also invited to challenge me on anything said below. Only by educating yourselves will you learn the truth about just how bad and how far-reaching is today's corruption!

ISED (Innovation Science and Economic Development Canada), previously called Industry Canada, is the sole approving authority for the erection of cell phone towers in Canada, and **THAT** should strike fear into the hearts of those who naively think (as this writer once did) that the Government of Canada is protecting them from man-made radiation! The reality is, pandemic corruption, not just in Canada, but in most Western countries, literally threatens the health and safety of every person on this earth! The evidence is overwhelming and irrefutable – but one must take the time to look! Today's unprecedented corruption dates back to the 1960s, when the then *Health and Welfare Canada's* (now Health Canada's) *Radiation and Protection Bureau* and their colleagues in what was then Industry Canada (now ISED) elected to join the corrupt US Military-Industrial-Complex (US M-I-C), which is discussed at length in the attachment. <https://www.history.com/this-day-in-history/eisenhower-warns-of-military-industrial-complex> In the following link are my August 6, 2017 letter to Prime Minister Trudeau and my subsequent August 31, 2017 letter to Health Minister Ginette Petitpas Taylor, neither of which received a reply! <https://www.smart-safe.com/blogs/news/radiation-dangers-spelled-out-to-canadian-officials> Were it not for North America's mainstream news media's deafening silence on this whole **non-thermal** electro-magnetic field (EMF) radiation issue, today's unprecedented corruption could not possibly happen! <https://answers.yahoo.com/question/index?qid=20091217184824AAp62jC> Facts the public needs to know include:

- Electro-magnetic field (EMF) radiation is silent, invisible, odorless and tasteless, yet today it literally is everywhere!
- EMF radiation can be **thermal** (which the body **can** sense / detect), or **non-thermal** (which the body **cannot** detect / sense).
- Anything in which electrical current flows emits hazardous **non-thermal** electric fields and **magnetic** fields or EMFs.
- All wireless radio products, including cell phone towers, emit pulsed **non-thermal** EMFs!

- Non-industry scientists the world over **KNOW** that **pulsed non-thermal** EMFs do more damage to the human body than do non-pulsed EMFs!
- World-class insurance companies such as Lloyd's of London and Swiss Re refuse to offer liability insurance against health effects to protect those whose products emit **non-thermal** EMFs! <https://www.washingtonwirelessawareness.com/are-you-concerned-about-the-unforeseen-risk-of-exposure-to-electromagnetic-fields/>
- Non-industry scientists know that there is NO 'safe' threshold of **non-thermal** EMFs; the only safe level is ZERO! <http://www.stayonthetruth.com/neil-cherry.php>
- Non-industry scientists the world over **KNOW** that **non-thermal** EMFs **CAUSE** cancers ... and most, if not all, of today's disease epidemics! <https://www.emfsa.co.za/research-and-studies/thermal-and-non-thermal-health-effects-of-low-intensity-non-ionizing-radiation-an-international-perspective/>
<https://www.emfacts.com/2017/11/bioinitiative-report-medical-concerns-intensify-over-deadly-brain-tumors-from-cell-phone-use/>
- In 1953, the US Navy had **Dr. Herman P. Schwan** determine for them their first-ever 'safe' Exposure Limit for those exposed to microwave EMFs – which he did, based **ONLY** on the **thermal** effects! In doing so, he also set the 'safe' Exposure Limit at an outrageously high **10 mW/cm²**! This limit enabled the navy to operate its high-powered radars at maximum power (see entries for 1966 and 1979, below)!
- In 1965, the US Air Force and US Army adopted the US Navy's dangerously-high **10 mW/cm²** 'safe' Exposure Limit for microwave EMFs and its **thermal effects ONLY** dogma!
- In 1966, all Five-Eyes member nations (USA, UK, Canada, Australia, New Zealand) also adopted the US Navy's dangerously-high **10 mW/cm²** 'safe' Exposure Limit and its **thermal effects ONLY** dogma! It is no wonder that any/all of today's civilian telecommunications products (including cell phone towers) easily 'COMPLY' with FCC 'standards'!
- In 1979, the infamous scientist, **Dr. Michael Repacholi**, set Health Canada's initial Safety Code 6 'guidelines' for RF EMFs, which proved to be similar to those of the US Navy: **10 mW/cm²** as the 'safe' Exposure Limit and recognized **ONLY** the thermal effects of RF EMFs! This explains why the EMFs emitted by **any** civilian telecommunications product (including cell phone towers, Wi-Fi routers, cell phones, 'smart' meters, etc) easily 'COMPLIES' with Safety Code 6!

(Note: Readers also need to note that **Dr. Repacholi** initially headed-up Health Canada's Radiation Protection Bureau, before moving to the WHO (World Health Organization). While at the WHO, he played a key role there in not only creating what is known today as a corrupt and industry-friendly "ICNIRP" (International Commission on Non-Ionizing Radiation Protection) but he also played a major part in setting 'safe' Exposure Limits for RF EMF, not just for ICNIRP, but also for the WHO. Unbelievably, this one corrupt scientist, **Dr. Michael Repacholi**, played a major role in setting the 'safe' Exposure Limits for RF EMFs for all three agencies: Health Canada, ICNIRP and the WHO, all three of which now had guidelines similar to those of the US Military ... and all "Five-Eyes" member nations! <https://lennarthardellenglish.wordpress.com/2017/06/21/world-health-organization-radiofrequency-radiation-and-health-a-hard-nut-to-crack-review/>

- 1996 saw the passing of “The Telecommunications Act,” which gave the FCC (Federal Communications Commission) - an agency known to have been captured by the very industries it is supposed to regulate, the authority to ignore state and municipal governments in the placement of cell phone towers! This is similar to ISEDC being Canada’s sole authority!
<https://www.saferemr.com/2015/06/an-expose-of-fcc-agency-captured-by.html>
<https://www.emfanalysis.com/wp-content/uploads/2015/07/FCC-Captured-Agency-by-Norm-Alster.pdf>
- In 2004, it was said: “As all Western countries’ Safety Standards or ‘Guidelines’ are based purely on thermal effects, these limits are **one thousand billion times** higher than the natural radiation in these frequencies that reaches us from the sun!” http://emwatch.com/wp-content/uploads/2013/11/Naila_study.pdf?0c6aef&0c6aef
- April 28, 2010 – This was the beginning of the end of democracy in British Columbia! The Government of BC passed its ‘Clean Energy Act’ (Bill 17), which paved the way for the **mandatory** installation of wireless ‘smart’ meters on every home and occupied building in the province! The public were never told that inside every ‘smart’ meter are two (2) microwave radio circuits, both of which emit hazardous pulsed **non-thermal** radiation throughout the day and night, in perpetuity! The more powerful of the two transmitters emits its radiation on 910 MHz for distances of up to 3 km - in all directions! The public are not told that every smart meter in a ‘meshed-grid community’ radiates every home in a community (within a 3 km radius) and, in turn, is irradiated by every other home’s smart meter!
- May 31, 2011 - The WHO’s “IARC” (International Agency for Research on Cancer) classified RF EMF a Class 2B “Possible” Carcinogen! (Scientists say that, had the WHO considered the **2001 E.U.-funded REFLEX Study**, it likely would have justified classifying EMFs a “PROBABLE Carcinogen”! http://www.bclaws.ca/civix/document/id/complete/statreg/10022_01
- Despite the WHO’s classification of EMFs as a “Possible Carcinogen”:
 - Neither Health Canada, nor any provincial government, nor any PHO (Provincial Health Officer) intervened or even attempted to stop electric utilities from installing their hazardous wireless ‘smart’ meters (whose two microwave radio circuits spew pulsed **non-thermal** EMFs – in all directions - day and night)!
 - Nor did any provincial government, nor any PHO - in Canada - speak up and urge Health Canada or provincial governments to invoke the “Precautionary Principle” in order to protect the public ... or urge government to put the onus on **industry** to prove their technologies are safe, to be used by, on and around people – of all ages, of all sizes, of all levels of wellness on a 24/7/365 day basis in perpetuity!
- Although British Columbia’s two PHOs may well have been outstanding family medical practitioners, neither the current PHO, **Dr. Bonnie Henry, MD**, or her predecessor, **Dr. Perry Kendall, MD** (who retired in 2018), has/had any credible expertise in power line frequency (50 Hz/60 Hz) **non-thermal** EMFs, pulsed **non-thermal** RF EMFs or in electro-hypersensitivity “**EHS**”! Their technological ignorance of **non-thermal** EMFs, which experts around the world know constitute the greatest-ever threat to the future of mankind, <https://www.globalresearch.ca/5q-stupidest-idea-history-world/5675638> means that BC’s PHOs need to seek guidance on all such matters from the perpetrator of this

Mother of all Crimes – the historically corrupt Health Canada and its industry-friendly ISEDC!

http://www.iarc.fr/en/media-/pr/2011/pdfs/pr208_E.pdf

- June 30, 2011 – This marked the end of democracy in BC. The same provincial government that mandated ‘smart’ meters in the province, on this date signed a 10-year, \$100-million/year contract with Telus Corp. authorizing the latter to update all government telecommunications facilities in BC. The contract specifically identified all six Regional Health Authorities in addition to other provincial entities! With a corrupt Health Canada and woefully ignorant BC PHO’s (of EMFs and EHS), Telus (like all telecom companies across Canada) enjoyed free reign to install wireless technology wherever they wanted – even in cancer clinics, hospitals, medical clinics, nursing homes, schools, public buildings, provincial transit systems (e.g., BC Ferries) etc.! This explains why the above facilities are all now awash in extremely profitable but hazardous wireless products! <https://www.thetelecomblog.com/2011/06/30/telus-enters-10-year-contract-with-british-columbia-government/> (Author’s comments: It needs to be repeated that not a single one of today’s wireless products – including cell phone towers, baby monitors, cell phones, cordless phones, Wi-Fi routers, Bluetooth devices, tablet and laptop computers, ‘smart’ meters, GPS and other satellites, etc. has ever been independently tested and proven to be safe to babies, children, pregnant women, those in poor health, let alone the general public! Such is the power of Industry!
- The BioInitiative 2012 Report (29 authors, including 21 PhDs and 10 medical experts, from 10 different countries) concluded, in part, that:
 - power line (50 Hz/60 Hz) EMFs and RF EMFs both **CAUSE** cancer and should be classified a Group 1 carcinogen (**Known Carcinogen**)! <https://bioinitiative.org/conclusions/>
 - Health Canada’s globally-vilified Safety Code 6 ‘safe’ Exposure Limit for RF EMFs needs to be lowered some **3-6 million** times! <https://bioinitiative.org/conclusions/> (last page)
 - with respect to cell phone towers, the Report stated that “at least five new cell tower studies are reporting bioeffects (i.e., **non-thermal** effects) in the range of **0.003 to 0.05 $\mu\text{W}/\text{cm}^2$** ...” This is almost a **million times** weaker than the permissible **1000 $\mu\text{W}/\text{cm}^2$** ‘safe’ Exposure Limit allowed by Safety Code 6, the US Military, IEEE/ICES and FCC, and thousands of times weaker than ICNIRP’s and the WHO’s **800 $\mu\text{W}/\text{cm}^2$** guideline!
- Contrary to what Health Canada states on its website, Safety Code 6 protects **only** against the thermal effects of RF EMFs! (This was admitted in Feb. 2013 in a Quebec Superior Court by Health Canada’s own **Dr. James McNamee**!) <https://www.canada.ca/en/health-canada/services/environmental-workplace-health/consultations/limits-human-exposure-radiofrequency-electromagnetic-energy-frequency-range-3-300.html>
<https://magdahavas.com/health-canada-admits-safety-code-6-guideline-for-microwave-radiation-is-based-only-on-thermal-effects/>
- In 2015, Safety Code 6 ‘safe’ Exposure Limits for RF EMFs were reduced some **66 times**, but the BioInitiative 2012 Report said then that it had to be lowered **3-6 million times**! <https://bioinitiative.org/conclusions/>

In conclusion, all people need to be aware that, thanks to the US M-I-C, the electric power generation and telecommunications industries have captured and/or control many Western

governments, at all levels, to the extent that scientists say that mankind is threatened today as never before in our history. Because the US' major allies adopted the US Navy's outrageously-high 'safe' Exposure Limit for RF EMFs, the electric power generation and telecommunications industries easily comply with Safety Code 6, ICNIRP, WHO, IEEE/ICES and FCC Standards/guidelines! While there is still time, the public must educate themselves about man-made EMFs and pulsed EMFs! Scientists know that there is no such thing as a 'safe' cell phone tower ... or any other wireless product that emits *non-thermal* EMFs! Some level of government – somewhere - must eventually stand up and demand that this unbelievable corruption and crime against humanity STOP! Communities must re-claim from national government agencies the responsibility for and sole authority to regulate and control all man-made activities within their jurisdiction having the potential to harm the public's safety or health! The perpetrators of this inconceivably cruel crime should be tried and, those found guilty, sent to prison!

Sincerely,

J.G. Flynn, Captain (Retired)

Bowser, BC

P.S. I will readily divulge my contact details when/if warranted.
