

TELUS neglects to inform of cell tower radiation health risks

- 2011 - Cell tower radiation classified as a possible human carcinogen, by the WHO.
- 2018 - The Worlds Largest Animal Study - Cell Tower Radiation Confirms Cancer Link!

Two 10 year studies by The US Government National *Toxicology Program* and the *Italian Ramazzini Institute - Cell Tower Study*, revealed disturbing findings of cancer, and other adverse health effects, well below Canada's safety guideline. (Safety Code 6)

- 2013 - Health Canada admits *Safety Code 6 guideline* for cell tower microwave radiation is based **ONLY** on thermal effects, before Superior Court of Quebec. Biological effects are NOT considered!

The safety limits in this code apply to all individuals working at, or visiting, federally regulated sites. Is your home, or child's bedroom a federal site? TELUS misleads the public by stating that they adhere to Code 6, which has been condemned by international science as non-protective and obsolete. Cell tower radiation penetrates your home and body 24/7!

- **Doctors and scientists are speaking out against cell tower radiation, due to cancer clusters, observed near cell towers, around the world.**

American Academy of Environmental Medicine:

"The peer reviewed, scientific literature demonstrates the correlation between RF (cell tower radiation) exposure and neurological, cardiac, and pulmonary disease as well as reproductive and developmental disorders, immune dysfunction, cancer and other health conditions.

The evidence is irrefutable"

Aug. 2010 New York Times: *Cell Antennas And Cell Towers Near Homes Affect Property Values. Documented, by as much as 20%!*

Come to the community center June 6th, from 4-7pm. Say **NO to Telus' proposed cell tower in Gold River, on Trumpeter Drive, across from your hospital, close to homes and school.**

Speak out and say **NO!** It is **YOUR** right!
