

Citizens For Safe Technology  
818 Bexhill Place  
Victoria BC V9C 3V5

Tuesday, June 18, 2019

Dear

**You Are Invited**  
to  
**A Special Information Session**  
**for Local Politicians & Health Care Leaders.**  
about  
**Serious Health Concerns of 5G Networks in our Communities & Safe Solutions**  
with  
**Dr. Martin Pall, PhD. & Dr. Timothy Schoechle, PhD.**  
**Wednesday, July 3rd, 11:30 -1pm**  
at  
**The London Chef, 953 Fort Street**  
**Light Refreshments Served.**

**Space is Limited, Please RSVP by Monday, June 24th.**

As elected officials and health care administrators, you are confronted daily with issues that affect the health and well-being of the public. A new challenge is heading your way: 5G technology -- and it currently is being rolled out to every community in British Columbia. This technology involves a new type of antenna that emits radiation very close to homes at levels which are very concerning to experts. Citizens are concerned because they have no way to avoid these devices and their effects.

Countries, cities and municipalities around the world, are working to stop 5G rollouts due to concerns about the health hazards for their citizens. Those who have succeeded in stopping it include: Brussels, Belgium; Portland, Oregon; Faux, France; Florence, Italy; major areas of Switzerland and many places in the USA.

Hundreds of peer reviewed studies, by independent scientists (i.e. not paid by telecom and wifi Industry,) have found that prolonged exposure to even low levels of wireless radiation, is dangerous --damaging cells, DNA, immune function and causing damage to the heart, kidneys and neurological systems. The new 5G milliwave radiation will mean exponentially greater exposure!

We are very fortunate to have 2 world-renowned scientists, available to meet with you to explain this new health-care concern; offer ideas to confront this issue and to answer your questions.

**Dr. Martin L. Pall, PhD., is Professor Emeritus of Biochemistry and Basic Medical Sciences at Washington State University. He is an internationally-recognized expert on the science behind 5G. His groundbreaking review articles, show the mechanism by which human-generated electromagnetic frequencies cause serious biological and health effects.**

**Dr Timothy Schoechle, PhD., is author of *Re-Inventing Wires*. He is the global expert on wired fiber networks. He sits on the standards board of the Institute of Electrical and Electronics Engineers (IEEE), is a former faculty member of the University of Colorado, College of Engineering and Applied Science, and is Senior Research Fellow, at the National Institute for Science, Law and Public Policy.**

**We Look Forward To Your Presence.**

Please NOTE: Due to space limitations, we have space only for 2 members from your Health Department.

To RSVP or ask questions please email: [safetech@shaw.ca](mailto:safetech@shaw.ca)
