

Champions of the “Thermal Effects Only” Dogma For EMFs

Europe

‘Investigate Europe’ (nine experienced journalists from eight European countries) identified the following 14 scientists who they claim champion the thermal effects ONLY dogma: Martin Röösl, Anthony Swerdlow, Maria Feychting, Simon Mann, Anders Ahlbom, Joachim Shūz, Zenon Sienkiewicz, Maria Rosarta Scarfi, Norbert Leitgeb, Michael Repacholi, Sarah Loughran, Emilie van Deventer, Gunnhild Qftedal (?), Eric van Rongen”

North American and Other Defenders and Champions

(At least five of the names noted by European reporters are mentioned here as well):

- **Health Canada Scientists**

Former and current EMF scientists include:

Drs. Maria Stuchly, conflicted Daniel Krewski, Michael Repacholi (an ICES member and chairman emeritus of ICNIRP, and is now an industry consultant), James McNamee (an ICES member), Art Thansandote (although he retired from Health Canada as their senior EMF scientist in 2015, he still is and has been for more than 10 years Co-Chairman of ICES’ sub-committee 4, which determines for the US Military and the USA ‘safe’ Exposure Limits for RF in frequencies 3 kHz-300 GHz) and Pascale Bellier.

- **BC Cancer Agency Scientist**

Mary McBride (who was exposed by Canada’s largest commercial TV network, CTV, when it found her not to be a qualified “PhD” or the “Dr.” she had allowed others to address her or to call and/or refer to her as, as she had done for so many years). Her studies have consistently found in favor of there being no harmful effects to either ELF EMFs or RF EMR. [19] [20]

- **Other Extremely Influential Canadian Champions – but Non-Scientists**

These promoters of the thermal effects ONLY dogma, realistically, could not have known the hazards of pulsed **non-thermal** EMFs, included:

Bernard Lord, QC, PC, the former Pres/CEO of CWTA (Canadian Wireless and Telecommunications Association) (2008-2016), and his successor,

Robert Ghiz, Pres/CEO of CWTA (effective Jan., 2017). Both had previously been provincial premiers.

- **BC’s current Provincial Health Officers (PHO)**

Dr. Bonnie Henry, MD, the current PHO

Dr. Perry Kendall, MD, the inaugural and only other PHO, now retired.

Neither ever saw fit to respond to any of my many emails and both seemed content to remain deaf and dumb to any/all criticism from other concerned and informed citizens while they defended and championed whatever Health Canada / Safety Code 6 said about EMFs/EMR/EHS!

- **The USA's FCC (Federal Communications Commission)**

Although the FCC has no EMF scientists of its own, this agency promulgates to the world what are purported to be their 'safe' Exposure Limits for RF EMR. In reality, the FCC simply adopts the 'safe' Exposure Limits determined by the U.S. Military-controlled ICES TC-95 (Technical Committee 95) subcommittees 3 and 4, and promulgates them to the world as if they were the FCC's own guidelines!

Ajit Pai, the current chairman and a previous Verizon lawyer, appointed by *U.S. President Trump*, has recently approved the launch of yet more thousands of satellites in space, which are intended to irradiate every inch of space on earth with "5G" microwave frequencies in order to bring broadband Internet to everyone on the planet – whether they want it or not! This, despite the fact that "5G" frequencies have never been independently tested by EMR experts to prove that they are safe to the public! <https://www.engadget.com/2017/12/09/fcc-chairman-jokes-about-being-verizon-shill/> Like his predecessor, Pai champions wireless technology and Wi-Fi for everyone; ignores literally thousands of scientific reports from around the world that say that EMFs (all frequencies) are hazardous to people and all living things, and ignores scientists' pleas, globally, that urge all governments to ban "5G" technology from space and earth!

Tom Wheeler (2013-2017), the previous chairman and also not a scientist, was appointed by then *U.S. President Obama*. Wheeler was the first to approve the launch of thousands of satellites which will use "5G" technology to irradiate earth's entire surface with microwave frequencies!

<http://www.renegadetribune.com/terrifying-fcc-chairman-tom-wheeler-future-5g/>

- He championed, almost maniacally, the urgency for America to embrace and implement 5G technology! <http://es-forum.com/Tom-Wheeler-National-Press-Club-5G-Rush-Job-td4029516.html> In 2008, he raised more than \$700,000 (U.S.) for Barack Obama's election campaigns. From 1992-2004, as Pres/CEO of CTIA (the Cellular Telecommunications Internet Association), *Wheeler's* job was to lobby all governments in the USA on behalf of wireless and telecom companies. Wheeler was inducted into that industry's Hall of Fame! (He is the only person ever to be inducted into both halls of fame; see below!) From 1976-1984 *Wheeler* was Pres/CEO of the Cable and TV Association, eventually being inducted into that industry's Hall of Fame!

- **Independent Industry Consultants**

Clearly, the most significant and influential champion of this dogma is, and has been for many years, Exponent Inc.'s Dr. William F. Bailey who, in addition to being a key 'product defence scientist' for electric utilities (throughout North America, at least), is an important member of both U.S. Military-dominated ICES subcommittees 3 and 4. Also, it was he to whom the **WHO's notoriously corrupt** Dr. Michael Repacholi, in 2005, sent a draft copy of the proposed ELF EMF 'safe' Exposure Limits asking for his comment!). <https://smallcellsinmontgomerycounty.blogspot.com/2018/11/jerry-flynn-timeline-of-radiation.html>

- **Other Key American Champions include:**

ICES' members: Ken Foster, John Moulder, Joe Elder, Mays Swicord, Richard Tell,

etc., (Both Foster and Moulder previously had been selected by Health Canada to function as Expert Panel Members to review Safety Code 6)! Also, in 2005, ICES' Ken Foster, John Moulder, Linda Erdreich (of Exponent Inc.) and Health Canada's James McNamee co-authored a study on mobile phones and mobile phone base stations and cancer[22]. Another champion is UCLA's Leeka Kheifets, formerly with EPRI (Electric Power Research Institute) and a long-time member of ICNIRP (See below).

- **Sweden's Key Champions** are conflicted Anders Ahlbom and Maria Feychting (she also happens to be the current Vice Chair of ICNIRP. Both Feychting and Kheifets (above) previously worked for/with Dr. Michael Repacholi when he was at the WHO. <https://www.emfacts.com/2011/05/1400-more-rats-in-the-iarc-barrel/> <https://www.stralskyddsstiftelsen.se/2018/02/anders-ahlbom-and-maria-feychting-mislead-about-research-on-health-effects-from-electromagnetic-fields-in-new-report/>
- **The U.K.'s Key Champion** is conflicted Dr. Anthony Swerdlow, an ICNIRP board member, head of epidemiology at the Institute of Cancer Research, Chairman of the 'Independent' Advisory Group to Britain's Health Protection Agency. He and his wife are both reputed to be major investors in several large British telecom companies! <https://firstdonoharmblog.blogspot.com/2011/09/anthony-swerdlow-telecom-investors.html>
