

Safety Code 6 – Canada’s Public Enemy No. 1

Man-Made Radiation

The ‘radiation’ to which Safety Code 6 applies is called ‘non-ionizing,’ meaning that it lacks sufficient energy to liberate an electron. This ‘non-ionizing’ radiation comes in either of two forms: **thermal** – that which heats the skin and which the body can sense and detect; and **NON-thermal** – that which does not heat the skin, but which the body **CANNOT** sense or detect! Non-industry scientists and the major militaries of the world have long **KNOWN** that **NON-thermal** radiation **CAUSES** cancers and most, if not all, of today’s disease epidemics (albeit not exclusively)!

The Evolution of ‘Safe’ Exposure Limits for Radio / Microwave Frequency (RF) Radiation

Western health regulatory agencies base their ‘safe’ Exposure Limits for those exposed to RF electro-magnetic field (EMF) radiation on the Standards established, in 1953, for the US Navy by former German scientist, **Dr. Herman P. Schwan**. Using a calculator, he literally ‘calculated’ what he thought would be ‘safe’ Exposure Limits: 100 W/m² – **based solely on the thermal effects** (of microwave radiation emitted by US Navy radars) - which still allowed the US Navy to operate its most powerful radars at maximum power. This extraordinarily-high 100 W/m² Standard was adopted in 1965 by the US Air Force and US Army and, in 1966, by the USA, the UK, Canada, Australia and New Zealand! https://en.wikipedia.org/wiki/Herman_P._Schwan

Readers need to realize that just one notoriously corrupt, former Health Canada scientist, **Dr. Michael Repacholi, PhD**, was instrumental in setting essentially the same US Navy Standard (with its egregiously high ‘safe’ Exposure Limit of 100 W/m², and which recognized **ONLY** the thermal effects of RF EMFs), **first** - for Health Canada (1979); **secondly** – for ICNIRP (International Commission on Non-Ionizing Radiation Protection) (1998); and, **thirdly** - for the WHO (World Health Organization) (prior to 2006)!

<http://idd.de/umtsno/odpsejm/electricwords/RepacholiResume.htm>

Readers also need to realize that, in 2005, this same infamous **Dr. Michael Repacholi PhD**, assisted by eight (8) industry representatives (whom he had personally invited to assist him), also established - for the world (excluding the USA) - supposedly ‘Safe’ Exposure Limits for extremely low frequency (ELF) or “Power Line” frequency (50 Hz/60 Hz)] EMFs!

<https://microwavenews.com/news-center/who-and-electric-utilities-partnership-emfs> This explains why Health Canada, ICNIRP and the WHO all say, as one, that magnetic fields of up to

Canada's Public Enemy No. 1 (Cont'd)

2,000 mG are safe; whereas non-industry scientists say that a safe ambient level of magnetic field in a home or school should not exceed even 1 mG! It also explains why electric power utilities are permitted to build their overhead power lines, substations, power transformers dangerously close to schools, hospitals, residential communities, public parks, etc. Thanks to **Dr. Michael Repacholi**, electric utilities save literally billions of dollars in real estate costs they otherwise would have to spend in order to buy the additional land necessary for them to provide the public with larger/safer 'buffer zones' needed to separate them from the utility's infrastructure.) Telecom companies are also deeply indebted to **Dr. Michael Repacholi**, for it was he who adopted the US Navy's 'thermal effects ONLY' Standard for Health Canada, ICNIRP and the WHO.

<https://www.electricsense.com/magnetic-fields-safe-levels-exposure-emfs/>

Health Canada's Mandate

The Government of Canada states that it: "is committed to protecting the health and safety of Canadians from environmental risks, including those posed by radiofrequency (RF) electromagnetic energy – the kind of energy given off by various electronic devices, such as cell phones and Wi-Fi, as well as broadcasting towers." But, as can be seen in the above, thanks to **Dr. Michael Repacholi**, instead of protecting the public from RF EMFs, Safety Code 6 largely ignores the public's legitimate needs in order to protect and promote industrial growth and commercial development!

<https://www.canada.ca/en/health-canada/services/environmental-workplace-health/reports-publications/radiation/fact-sheet-what-safety-code-6.html>

<https://www.canada.ca/en/health-canada/corporate/mandate.html>

Despite its mandate, Health Canada ***puts the onus on the public*** to prove, beyond a shadow of a doubt, that **NON-thermal** radiation is harmful, rather than put the onus on Industry to prove that their technologies are SAFE! Not a single consumer wireless radio product (even baby monitors or smart meters) has had to undergo pre-market testing (by qualified, independent experts – having no ties to industry) to determine if it is SAFE to be used by, on and around people of all ages, of all sizes, of all levels of wellness on a 24/7/365 day basis in perpetuity!

Informed people know that wireless smart meters and all consumer wireless radio products emit "**pulsed**" **NON-thermal** RF EMFs, *which are known to be more harmful to human biology and health, yet Safety Code 6 makes no mention of **pulsed** non-thermal RF EMFs!*

<https://magdahavas.com/pick-of-the-week-12-why-pulsed-microwave-frequencies-are-more-harmful/>

Canada's Public Enemy No. 1 (Cont'd)

Safety Code 6 recognizes ONLY **RF** EMFs; whereas scientists and informed people around the world know that Extremely Low Frequency (ELF) - more commonly known as "Power Line Frequency" (50 Hz/60 Hz) – EMFs, also emit **NON-thermal** EMFs, which, experts say, **CAUSE** cancers and most, if not all, of today's disease epidemics!

<http://www.stopsmartmetersbc.com/2017-12-22-bioinitiative-updates-with-as-many-as-90-of-new-studies-showing-harm/>

Because Safety Code 6 omits any mention of Power Line EMFs, Health Canada, leaves / allows / causes the public to believe that they must be perfectly safe – which is absolutely untrue! Non-industry scientists know that both the electric and magnetic fields are harmful to people, and that ELF magnetic fields are known to **CAUSE** leukemia and other cancers, as well as many of today's so-called 'diseases of civilization'!

<https://www.altermedicine.org/childhood-leukemia-and-electromagnetic-fields/>

<http://www.sammilham.com/>

<http://www.stayonthetruth.com/neil-cherry.php>

<https://www.electricsense.com/2951/bioinitiative-report-on-electromagnetic-field-emf-dangers/>

<https://www.safespaceprotection.com/news-and-info/professional-concern-about-emfs-2/>

Because Safety Code 6 does not even mention ELF EMFs, Health Canada is protecting the electric power generation industry and allows them to erect / locate their infrastructure in areas that jeopardize the public's safety and health.

Because Safety Code 6 does not recognize the **NON-thermal** effects of RF EMFs, one is left to believe that they must therefore be 'legally' SAFE! Were it otherwise, wireless smart meters and the ever-expanding constellation of extremely profitable consumer wireless radio products would not be allowed in Canada! <https://truth11.com/2015/01/24/safety-code-6-enabling-depopulation/>

Because Safety Code 6 does not recognize that there exists a condition known as electro-hypersensitivity (EHS), those poor souls who now suffer from it are callously left to fend for themselves. Those worst affected are incapable of holding a job and/or even living in their own home – due to the EMF radiation that now floods most neighborhoods in all countries.

When the WHO classified RF EMFs a Class 2B ("Possible" carcinogen), in 2011, Health Canada failed to honor its mandate (to protect the safety and health of its people) when it failed to impose the "Precautionary Principle" (which, in part, would at least have put the onus on electric power utilities to prove their **non-thermal** EMF radiation was SAFE to humans, of all

Canada's Public Enemy No. 1 (Cont'd)

ages, of all sizes, of all levels of wellness 24/7/365 days a year in perpetuity). Instead, HC ignored the WHO and permitted electric power utilities to continue rolling-out their insidious, pernicious wireless Smart Meters that, in 2019, flood every “meshed-grid” community across Canada with incalculable amounts of pulsed **non-thermal** microwave radiation, which the WHO said ‘Possibly’ causes cancer!

Non-industry scientists know that there is NO ‘safe’ threshold of **non-thermal** EMFs; the only safe level is ZERO! <http://www.stayonthetruth.com/neil-cherry.php>
<https://www.emfacts.com/2017/11/bioinitiative-report-medical-concerns-intensify-over-deadly-brain-tumors-from-cell-phone-use/>

It is particularly upsetting to note that not once - in the past 55 years - did Health Canada (or its predecessor Health and Welfare Canada) exercise its prerogative to impose the Precautionary Principle in order to protect the public! In part, this would at least have put the onus on industry to prove their technologies are SAFE – i.e., to be used by, on and around people of all ages, of all sizes, of all levels of wellness on a 24/7/365 day basis in perpetuity!

Because Safety Code 6 will not recognize the hazardous biological and health effects of **NON-thermal** RF EMFs, industry and telecom companies are now salivating and anxious to roll-out their revolutionary, massive “5G” Technology (which is designed to bathe every inch of space on Earth – simultaneously - from 20,000+ satellites in space, and from hundreds of thousands of earth-based microcell towers (situated in front of every 3rd to 10th home in every community on earth)! <https://www.5gspaceappeal.org/the-appeal/> Dr. Martin Pall, PhD., Professor Emeritus from Washington State University has said that 5G is the “Stupidest Idea in the history of the world.” <https://www.collective-evolution.com/2019/02/19/5g-is-the-stupidest-idea-in-the-history-of-the-world-washington-state-biochemistrymedical-science-prof/>

Some of the key defenders and/or champions of the thermal effects ONLY dogma are named in the Attachment.

In conclusion, it boggles one’s mind to know that just one corrupt, former Health Canada scientist, **Dr. Michael Repacholi, PhD**, played a key role in establishing what were supposed to ‘safe’ Exposure Limits for people exposed to both Power Line Frequency (50 Hz/60 Hz) and RF EMFs for all three Western regulatory agencies: 1) Health Canada, 2) ICNIRP and, 3) the WHO! Also, Canada’s population needs to realize that Safety Code 6: a) puts the onus on the public to prove that EMFs are hazardous to people, instead of making industry prove their technologies are SAFE before being allowed on the market; b) ignores thousands of peer-reviewed studies that show EMFs are hazardous to people; c) has such a dangerously-high ‘safe’ Exposure Limit for those exposed to RF EMFs (for 1800 MHz) of **4,393,278.4 $\mu\text{W}/\text{m}^2$** ; d) does not recognize **NON-thermal** EMFs – regardless of frequency; e) does not recognize **PULSED** RF EMFs; f) does not recognize **Power Line frequency** (50 Hz/60 Hz) **EMFs** at all, and therefore provides absolutely no protection against the very real, known hazardous EMFs emitted by anything and everything in which (50 Hz/60 Hz) alternating current is flowing; g) enables electric power

Canada's Public Enemy No. 1 (Cont'd)

utilities and telecom companies to reap enormous profits from manufacturing, installing and/or selling an ever-expanding constellation of products which knowingly emit hazardous **NON-thermal** EMFs; and, g) refuses to recognize **EHS**. This is more than ample proof that Safety Code 6, instead of protecting the public's safety and health, is the general public's No. 1 enemy! Other Western countries need to be frightened as well, especially those that follow ICNIRP's 'guidelines' for RF EMFs, because these, like Safety Code 6, were predicated on Standards established in 1953 for the US Navy – which: a) had a 'safe' Exposure Limit for RF EMFs of **100 W/m²** (or 10,000,000 $\mu\text{W}/\text{m}^2$); and, b) were based **ONLY** on the **thermal** effects! And this was more than 30 years BEFORE wireless products appeared on the market – all of which emit **pulsed NON-thermal** EMFs! Worse still, ICNIRP's 'guideline' for Power Line frequency (50 Hz/60 Hz) EMFs were also developed by the infamous **Dr. Michael Repacholi, PhD** (with the help of electric power industry representatives, whom he had invited! This explains the huge discrepancy that exists today between what non-industry scientists say constitutes a 'safe' ambient level of magnetic field in a home or school and what ICNIRP says (which Health Canada endorses): not more than one milliGauss (1 mG) vs ICNIRP's 2,000 mG! Surreal as the above surely sounds, the worst is yet to come. But unless someone, somewhere, stops "5G" (which Safety Code 6, ICNIRP and the WHO's 'guidelines' all permit) scientists say that man will not have to worry about Global Warming (for mankind will no longer exist)! Given the absurdity and the enormity of this unimaginably evil 'crime - against all living things, not just people, on planet Earth – it would be impossible for the innocent people of the world to scream too loudly for some government – any government - to: a) ban 5G technology; and, b) immediately launch a thorough national - if not international - criminal investigation, to identify those callous, corrupt, sub-humans who are perpetrating this monstrously evil crime against all humanity! Those found to be guilty should be identified by name and receive the harshest possible punishment – commensurate with their crime! Finally, Health Canada, ISEDC, Canada's entire EMF community, and its electric power generation and telecommunications industries needs to be scrutinized, evaluated and closely monitored in future.

Sincerely,

J.G. Flynn, Captain (Retired)

Bowser, B.C.
