

Public Meeting For All Winnipeggers

Keep Wolseley 5G Radiation-Free

Find out why.

Let's stop the installation of more than 50 cell network antennas for 4G/5G¹ in our neighbourhood, and then thousands more throughout Winnipeg.

**You're
invited!**

Tuesday, August 11th, 2020, 7:00 pm
Vimy Ridge Memorial Park
821 Preston Avenue
Portage Avenue & Home Street, Winnipeg

Rain or shine • Bring a lawn chair • Public washrooms not open • Follow public health restrictions

SPEAKERS AND Q & A

- 1. Overview and plans for more than 3,400 and perhaps more than 7,000 4G/5G cell network antennas throughout the City of Winnipeg – estimates are that more than 50 antennas would be installed in Wolseley • Lyle Barkman: Local business owner and resident.**
- 2. Health Canada's "Safety Code 6" guidelines for antenna emissions are not protective of human health • Barry Malowanchuk P.Eng. (Retired): Former telecommunications engineer at Manitoba Hydro supervised workplace safety of workers' exposure to electromagnetic radiation from the antennas of cell, broadcast and microwave towers.**
- 3. Why radiation from cell antenna emissions is not healthy and installations without informed consent is a human rights violation • Jean-Paul Dorst Ph.D. (Biophysics-Max Planck Institute): Was instrumental in achieving replacement of asbestos-lined water supply pipes in Winnipeg.**
- 4. Environmental reasons to keep cell network antennas away from not only us but also from birds, bees and trees. Possible negative implications of 5G technologies on climate change and weather forecasting. • Margaret Friesen M.Sc.: Former Government of Canada Biologist, researched effects of environmental pollutants on natural ecosystems.**
- 5. Q & A Session. Information tables.**

¹ Includes radiofrequency radiation in the microwave and millimeter ranges.

Why we need to keep 4G/5G radiation emitting antennas out of our neighbourhood

- 393 scientists and medical doctors from more than 40 countries are warning the public that *“5G will substantially increase exposure to radiofrequency electromagnetic fields ... that has been proven to be harmful for humans and the environment.”* They have asked the European Union to stop the deployment of 5G technology *“until potential hazards for human health and the environment have been fully investigated by scientists independent from industry.”*

Source: <http://www.5gappeal.eu/>

- The 5G rollout has been halted in Brussels, Belgium, and parts of Italy and Switzerland until adverse health and environmental consequences can be more fully investigated.
- Scientists and doctors, including Dr. Anthony Miller, a Canadian MD, epidemiologist and former advisor to the World Health Organization, have stated that recent scientific evidence supports identifying radiofrequency radiation, including the 5G frequencies, as a hazard that is known to be *“carcinogenic to humans”* (the same as asbestos and cigarette smoking). Children are particularly vulnerable.
- In May 2019, Dr. Riina Bray, Medical Director of the Environmental Health Clinic/Women's College Hospital in Toronto, Ontario issued this statement: *“My clinic is already assessing patients from across Ontario who are sensitive to microwave radiation from their wireless devices including cell phones, Wi-Fi, and an increasing number of smart appliances...We expect 5G to add to this burden.”*
- More than 30 peer-reviewed scientific studies show DNA damage, and 3 reviews and meta-analyses show sperm damage from radiofrequency radiation emission levels that Health Canada claims are safe.
