

EMF Medical Conference 2021 Promotional Information

Registration is open!

<https://emfconference2021.com/>

<https://www.facebook.com/EMFMedConf2021>

<https://twitter.com/EMFMedConf2021>

<https://www.instagram.com/emfmedconf2021/>

Early bird pricing until September 15, 2020!

If you are reaching out to the general public, please ask your followers to share the conference information with health care practitioners they know.

Content from our EMFMC 2021 newsletter:

The biological and health effects of electromagnetic field exposure are scientifically established and no longer deniable, and patients and clinicians are observing and documenting cases of EMF associated illness.

The EMF Medical Conference 2021, a virtual conference, will convene January 28-31, 2021 to review the latest exposure science. Leading physicians, clinicians, and scientists will conduct presentations on the recognition, diagnosis, and treatment of EMF associated illness, and experts in EMF assessment will present proven methods that can prevent or limit EMF exposure hazards. As a conference participant, you will receive:

- 4 days of learning
- 34 lectures
- 6 panels
- EMF Meter Workshop
- Interactive format to meet fellow attendees
- An interactive exhibit hall providing tools to enhance your practice

This conference has been approved for 16.5 hours of CME.

Register [here](https://emfconference2021.com/) for the Conference!

For more information visit: <https://emfconference2021.com>

Magda Havas, Ph.D., Professor Emerita

Prepare for EMF Medical Conference 2021 by enrolling in our
Virtual Pre-Conference Course:
Electrosmog & Electrotherapeutics 101.

Dr. Havas will provide a basic understanding of the electromagnetic spectrum, anthropogenic sources of electrosmog, natural sources of electromagnetic frequencies and their role in bio-modulation. Course consists of 4 hours of instruction plus 2 hours for Q&A for 4 CME credits.

Date: October 23 and 24, 2020

Time: 8 am until 11 am Pacific time

Early Bird Special cost of course if you register by September 15, 2020.

- \$99 - 4 hours of Continuing Medical Education (CME) credits
- \$49 - for those not seeking CME.

If you would like to enroll in the Pre-Conference Course separately, the price is \$129 (4 hours CME) and \$79 (non-CME).

Please contact info@EMFConference2021.com with any questions.

Register [here](#) for the Pre-Conference Course!

Early Bird Special Offer...
Register by September 15, 2020 and receive a full video of
Professor Olle Johansson's lecture from the 2019 EMF Conference
as a free gift.

Take advantage of our Early Bird Registration!

EMF Medical Conference Early Bird special pricing:
\$295.00 with CME by September 15, 2020 - after this date \$349
\$99.00 for general registration - after this date \$149

Contact info@EMFConference2021.com with any questions.

Olle Johansson, PhD Neuroscientist & Global Authority on Radiation and Health, formerly with the Karolinska Institute, spoke at the 2019 EMF Medical Conference. See clip of Professor Johansson's lecture from the 2019 EMF Conference: <https://vimeo.com/449013621>

Erica Mallery-Blythe MD will be speaking on *Electromagnetic Hypersensitivity (EHS)*
Diagnosis, Management and Prognosis at the
EMF Medical Conference 2021

See clip of Dr. Mallery-Blythe's lecture from the 2019 EMF Conference:
<https://vimeo.com/452597619>

Dr. Erica Mallery-Blythe is a UK trained medical doctor with expertise in Emergency Trauma Medicine. She has a broad base of medical experience including surgery, anaesthesiology, obstetrics, paediatrics and intensive care (both neonatal and adult). She has worked in hospital emergency rooms, led trauma teams, taught trauma medicine courses throughout the UK and abroad. In 2008, she began researching biological effects of non-ionizing radiation conducting her own research via medical histories, medical examinations and provocation testing of those with electromagnetic hypersensitivity (EHS). She has provided expert witness statements regarding EHS, and been invited to discuss the public health concerns of radiation exposure at the highest political level in Europe and the UK.

Dr. Mallery-Blythe founded Physicians' Health Initiative for Radiation and Environment (PHIRE) to provide information and advice for doctors and their patients as well as support for schools and parents to better protect the health of children. This group has international affiliations with medical doctors' groups abroad and they are currently constructing best practice guidelines for Electromagnetic Radiation (EMR) health.

Gunnar Heuser MD, PhD will be speaking on Functional Brain Scans of Patients Exposed to Neurotoxic Chemicals and/or EMF at the EMF Medical Conference 2021.

Gunnar Heuser, MD, PhD. is in his 90s and continues to research and publish on the brain. As a young doctor and PhD student in experimental medicine at the University of Montreal, he had the privilege to study under the famous Hans Selye. His studies on patients who have been exposed to electromagnetic fields (cell phone towers, smart meters, Wi-Fi, and cell phones) shows similar brain abnormalities to those found in his earlier studies on patients who had developed chemical sensitivity. He is especially worried about new chronic exposure conditions to 5th Generation Wireless technologies, especially since his studies on 2G have shown significant damage in brain scans. He will be speaking at EMFMC 2021.

See clip of Dr. Heuser's lecture from the 2019 EMF Conference:
