

URGENT: Protect our children, trees & bees
Connect fiber-optics (not wireless) for safe internet

Say "NO" to 4G & 5G
cell antennas
close to our
homes.

1 Sign the online petition
to Mayor Bowman and
City of Winnipeg Councillors

REASONS FOR CONCERN

Thousands of radiation-emitting network antennas within meters of homes and schools are being planned for Winnipeg.

No long-term safety testing: Neither Health Canada nor Innovation, Science and Economic Development Canada can point to any peer-reviewed evidence-based science that shows 5G technology is safe.

What we do know is of concern:

- **Cancer:** The World Health Organization's International Agency for Research on Cancer plans to re-evaluate this type of radiation. Recent animal studies showing "clear evidence of carcinogenicity" support hazard identification as a *known* carcinogen, as for asbestos and smoking.
- **Many other health effects:** DNA breaks, sperm damage, headaches, nausea, rashes, sleep problems, tinnitus, vertigo.
- **Who wants a repeat?** Asbestos, cigarette smoking, bisphenol-A (BPA), DDT, vaping, thalidomide, urea formaldehyde insulation.

WEBSITES • RESOURCES • CONTACTS

5G APPEAL to the European Commission:

Signed by 406 scientists and medical doctors from over 35 countries "*We recommend a moratorium on the roll-out of the fifth generation, 5G ... [radiofrequency radiation] has been proven to be harmful for humans and the environment.*"
