

[EMF] Our Safe School Tech banner in our local 4th of July parade

Hello EMF Activists,

I wrote to our local county library system, passing along our Safe School Tech compilation of 200 citations and inviting them to make libraries WiFi free.

They replied that their 'management team' would look into this. I sent a thank you note applauding their interest and included the table of contents of the BioInitiative report, so they could see the 500+ citations there on health issues.

Maybe libraries (dens of WiFi!!) are a way to reach public service officials....

Onward,
Lauren
