2:46 – 2:58	Open discussion and presentations from the floor
2:59 – 3:00	Closing remarks; next steps

**\* EPA Seeking Nominations to Serve on the Children's Health Protection Advisory Committee (Federal Advisory Committee)**

EPA is seeking nominations from nonfederal representatives to serve on the [Children's Health Protection Advisory Committee](#) (CHPAC). Established in 1997, the CHPAC Federal Advisory Committee provides independent advice to the EPA Administrator on a broad range of environmental issues affecting [children's health](#).

Candidates from diverse backgrounds include, but are not limited to, industry; tribal, state, county and local government; school systems; academia; health care providers (including pediatricians, obstetric professionals, occupational medicine practitioners and community nurses); and non-governmental organizations are encouraged to apply.

EPA values and welcomes opportunities to increase diversity, equity, inclusion, and accessibility on its Federal Advisory Committees. To obtain nominations of diverse candidates, EPA encourages nominations from a diverse pool of applicants in terms of gender, race, ethnicity, and geographic regions.

CHPAC members are appointed by the EPA Administrator for three-year terms with the possibility of reappointment to a second term. The Committee meets 2-3 times annually and the average workload is approximately 10 to 15 hours per month. Through its expert members from diverse stakeholder groups and from its various workgroups, CHPAC reviews and addresses a wide range of developments, issues and research areas such as pesticide exposures to children, environmental health in schools and child care settings, prioritization and data needs to protect children's health under the Toxic Substances Control Act, childhood lead exposure prevention, and climate change impacts to children.

Nominations should be submitted by August 15, 2022. Please refer to the [Federal Register Notice](#) for more details of nomination submission. EPA is aiming to reach a diverse and qualified candidate pool and ask you to share this notice with organizations that you believe may have suitable candidates, or with individuals you believe will be an asset to the CHPAC. Vacancies are expected to be filled by March 1, 2023.

If you have any questions, please contact Amelia Nguyen, Designated Federal Officer for CHPAC at [Nguyen.Amelia@epa.gov](mailto:Nguyen.Amelia@epa.gov).

### **Doris Knick:**

Doris Knick is a happily married Christian mother of two children, dual certified in Elementary and Early Childhood Education, certified as a Teacher of Speakers of Other Languages (TESOL), Reiki Master, and Wellness Advocate. She is passionate about protecting children, educating and empowering others to have informed consent and use natural solutions.

Woke up in 2020 when my children went VIRTUAL to the harms of WiFi as my children had symptoms, went to paper & pencil, hardwired and symptoms went away!!!  
Creating an Unstoppable Parents of Chesterfield VA group then got connected with Jenny through Zen Honeycut. Helped Jenny, Mary & Anastaysia to create Virginians for Safe Technology.

Began Homeschooling my children in Fall of 2020

Planning to create a Wired Informed Networking Website to share strategies that have worked for me for action takers. Currently have WIN Pages on Facebook & Instagram.

**Mark Wahl:**

Mark Wahl and family have been among about 1100 citizens of the City of Langley, on Whidbey Island, for over 30 years. For over three years he has assumed leadership of a growing group named CLEAR (Citizen League Encouraging Awareness of Radiation) now with about 200 mailing list and a small sustaining grant. In 2019 one of two cell towers in Langley likely played a role in the cancer death of an influential citizen who worked for years within 125 feet of it; Mark was determined to get city control over this "rogue" tower mis-located in a residential neighborhood for decades with no city supervision. His circuitous route to accomplish this is just reaching a milestone: in three weeks, the official installment of a new state-of-the art 48-page wireless code upgrade for Langley. He is already using this as an "Exhibit A" to lobby and persuade his County Commissioners to upgrade their puny 6-page code ASAP. He will share some of the ins and outs of this accomplishment and how it can be duplicated elsewhere.
