Mansons Landing, BC

Regarding proposed TELUS radio communications tower on Rexford Rd, Cortes Island
TELUS File: BC109114 – Mansons Landing

NOTICE OF NON CONSENT

We do not consent to the construction of the proposed tower as it is too close to many homes and the community hub. We do not consent to the destruction of a beloved nature trail called for by this proposal. **Accordingly, we call for the current proposal to be dismissed.**

We stipulate that the safety and well being of the people and the environment must come first when planning any new technology on our island.

We call for a meaningful public consultation for any *future* proposed tower, as have already been requested by the Cortes regional director Noba Anderson in her letter to TELUS from July 6, 2021, when the community rejected a similar proposal in the same neighbourhood.
