**Dr. Havidán Rodríguez**

President, State University of NY at Albany  
University Hall 302, 1400 Washington Ave  
Albany, NY 12222

**John B. King, Jr.**

Chancellor, State University of NY at Albany  
H. Carl McCall SUNY Building  
353 Broadway  
Albany, NY 12207

**The Honorable Kathy Hochul**

Governor of New York State  
NYS State Capitol Building  
Albany, NY 12224

**RE: Restore Full Academic Status for Dr. David Carpenter**

Dear Dr. Rodríguez, Chancellor King, and Governor Hochul:

We, the undersigned 2087 concerned citizens that include organizations, academics, physicians and the public, stand in full support of Dr. David Carpenter and urge you to restore his full academic status.

David O. Carpenter, MD is a professor and the founding dean of the School of Public Health at the University at Albany, SUNY. Dr. Carpenter is Director of the Institute for Health and the Environment at UAlbany and is a world-renowned expert on the environmental and human-health effects of polychlorinated biphenyls (PCBs). He has authored over 450 peer-reviewed scientific publications, including many on the health effects of PCBs. He has for years served as an expert scientific witness in litigation involving the health effects of PCBs and is currently testifying in 7 lawsuits involving the Monsanto Company, which has been acquired by Bayer. In May of 2022, Monsanto sent three FOIL requests to the University of Albany regarding Dr. Carpenter's finances and compensation for his service as an expert witness. Dr. Carpenter, who received prior approval from the University to serve as an expert witness and is within his rights to receive personal remuneration for these activities, has instead donated these funds to provide stipend support for his graduate students at UAlbany. Despite having done nothing wrong, the University has placed Dr. Carpenter on "alternate assignment," which involves banning him from entry to UAlbany campuses or to enter his office and laboratory to mentor his students in person and disallowing him from teaching courses at the University.

Although he is still free to serve as an expert witness, these punitive measures by the University serve to inhibit intellectual integrity, deny Dr. Carpenter's academic freedom, and to discourage his honorable responsibility to the public as a leading expert on the health effects of PCBs and other pollutants.

Dr. Carpenter's dedication to science for the public good and intellectual integrity is beyond question. He has been a powerful voice for some of the most environmentally challenged Americans, including the Akwesasne Nation of Upstate NY and Canada, native communities in Alaska, and members of an Alabama community that have suffered from PCB exposure. The University has not cited a reason for their egregious actions, and Dr. Carpenter has been essentially forced to work from his home, which has hampered his effectiveness as a mentor to his students and which is impacting their degree progress. These disciplinary actions by the University will most likely result in other faculty and staff remaining silent regarding these and similar issues for fear of reprisals by the University.

Accordingly, we, the undersigned, demand:

- The administration at the University at Albany must immediately rescind Dr. David Carpenter's "alternative assignment" status and remove all restrictions on his teaching and mentoring of students and his access to his laboratory and SUNY campuses.
- The administration must immediately reinstate his full academic status and discontinue the pretextual, coercive investigation into his professional activities as an educator and as a public health scientist whose job is, in Dr. Carpenter's words, "to hold polluters responsible and improve the health of people exposed to toxic chemicals by companies that knew that these substances were hazardous."

Sincerely,

**Mitchell Bernard,**
