Subject: New materials and Zoom presentations

Dear Sharon &,

Thank you for your advocacy to keep our children safe and to protect them from unnecessary exposures to RF radiation in their classrooms.

We have two new TechSafe School initiatives which we hope you will find helpful. The first is our new "**Be TechSafe**" laminated poster which we hope many teachers will agree to post in their classrooms. The simple recommended steps are based on peer-reviewed science from highly credible sources, and will not interfere in any way with a school's digital learning program.

The posters are free to TechSafe Advocates, but we're limiting the first run to two posters per request. If you would like to receive your free posters, simply send your name and mailing address to info@techsafeschools.org.

The second initiative we are offering is a short presentation/ ZOOM meeting between TechSafe School creators **Patti** or **Doug Wood** and your local teacher's union. Most teachers are very open to expert presentations from non-profit organizations, especially about workplace health & safety issues. Teachers of child-bearing age are often particularly interested in learning more about this subject.

Patti Wood
Executive Director
Grassroots Environmental Education

Our presentations take about 15 minutes, with additional time as needed for Q&A. There is no cost for these presentations.

First, ask your local teachers' union about their regular meeting schedule and inquire if they are interested in a professional presentation about RF radiation in the classroom. You can refer them to our website www.techsafeschools.org to better understand the issue.

We have made similar presentations to teachers unions in New York, Washington D.C. and Massachusetts. We need to educate EVERY teacher in every school across America!

If you get a positive response, call or email us to establish availability and confirm dates and times.

Don't forget to visit the [Resources](#) page of the TechSafe School website for the updated legal letter, the new Info Sheet for Administrators, the Children's RF Radiation Health Survey, and other helpful materials.

All of us at TechSafe Schools are grateful for your support of our program and your efforts to help us protect all children from harm. Please follow us on Facebook and watch your inbox next week for an important announcement about the FDA and the law.

Patti, Doug, Ellen, Christine, Patricia, Shawn & Maggie
